Bao Bun -dimsum steamer Metos BS460-EU

The Metos Bao Bun -Dimsum BS460-EU steamer is intended for the storing of speciality buns and can also be used to sell and display the buns, as it is an eye-catcher. The steamer is specifically designed for Bao buns, Dim Sum and other dumplings, as well as similar speciality items. The steamer can also be used for pies, pasties and any other items that require a humidity regulated storing space. The maximum temperature of the steamer is 85°C, thus it can also be used for reheating baked goods. The spacious water tank, clear temperature display and short-cut keys make it easy and quick to use the steamer. The steamer has a uniform special curved glass display, which stretches to three sides and, together with the efficient lighting and the leaning shelves, guarantees maximum visibility. Thanks to the five, 383x364 mm sized grated shelves, the steamer offers plenty of space for selling and displaying, despite its seemingly small exterior. The steamer's frame is made of stainless steel. Moreover, as the door opens fully across the whole steamer and the shelves are removable, it is extremely easy to clean the inside of the steamer, without having to reach around.

- intended for storing/steaming of Bao buns, Dim Sum and other speciality items
- designed for service sales, can be imbedded into a kitchen equipment line
- showy, 180° curved uniform glass display, which covers three sides of the steamer
- the double layered glass and the tightly closing door better the energy efficiency of the steamer
- five, tilted 383x364 mm grated shelves, carrying

capacity 1,5 kg / shelf

- digital temperature display and thermostat control
- automatic error alarm
- efficient 30W lighting
- operating temperature 75°C, reheating temperature 85°C
- removable shelves and water tank make cleaning easy

DELIVERY INCLUDES:

- washing brush for the seals capacity 1,5 kg / shelf
- digital temperature display and thermostat control
- automatic error alarm
- efficient 30W lighting
- operating temperature 75°C, reheating temperature 85°C
- removable shelves and water tank make cleaning easy

DELIVERY INCLUDES:

- washing brush for the seals

CODE: HOTFILL

Hot Fill pumps

Hot Fill means the bag-packing of food, that is at least 85°C, tightly into bags which are then quickly cooled down to 3°C. In this way, food will last for a longer time and both the taste and vitamin content are better preserved. The Hot Fill method is usually used to dispense foods that are liquid or mashed.

Full description

Contact our sales unit, so that we can help you design a functional Hot-Fill -pump system that fits your needs.

Metos Hot Fill pumps are intended for the efficient and quick bagging of liquid foods straight from the pot to the bag. Soups, sauces and mashed potatoes can be distributed effortlessly. Due to the built-in scale, the product is weighed automatically during the same work stage. Changing the administration process from bags to containers is easy and convenient. Metos Hot Fill -pumps ensure the congruence of the portions. The portion size and the speed of the dispenser are set up using the touchscreen and the different programs available. Therefore, the workflow is flexible and effortless.

The dispensing of hot foods usually comes with many health and safety risks. These risks can be minimized with the help of using either the manual or automatic dispensing system. In addition, the pumps effectively prevent bad posture while you work.

There are three Hot Fill -pump models available: Hot-Fill Dos 1, Hot-Fill Dos 2 and Hot-Fill Dos 3. In the Dos 3 -automatic system, the user does not have to be in direct contact with hot foods that are close to 90 Celsius degrees. The automatic bag-packing unit seals the bags once they are filled. Furthermore, the need for lifting products over long distances is reduced since the ready-packaged dishes are transported from the filling station to the operator via a small conveyor belt.

HOT-FILL DOS 1 – portioning and bag-packing

Most important features:

Portions soups, sauces etc.

Portions directly from the pot into Hot-Fill -bags or containers

Guarantees the longevity of products

Minimizes the risk of scalding

Increases workplace safety

Reduces occupational injuries to shoulders and wrists

Adjustable worktop (optional)

Built-in compressor (optional)

Quiet when used

Made from stainless-steel

The built-in semi-automatic CIP -system cleans the pipes, hoses and valves in the machine. All removable parts are dishwasher safe.

HOT-FILL DOS 2 – portioning and bag-packing

Most important features:

Portions mashed potatoes, soups, sauces etc.

Portions directly from the pot into the Hot-Fill -bags or containers

Quick change between the bag holder and roller track convenient for canteens

Guarantees the longevity of products

Touchscreen

Swivel wheels and brakes allow for portability and stability

Minimizes risks of scalding

Increases workplace safety

Reduces occupational injuries to shoulders and wrists

Made from stainless-steel

The built-in semi-automatic CIP -system cleans the pipes, hoses and valves in the machine. All removable parts are dishwasher safe.

HOT-FILL DOS 3 – fully-automatic portioning and bag-packing

Most important features:

Portions mashed potatoes, soups, sauces etc.

Portions directly from the pot into the Hot-Fill -bags

Guarantees the longevity of products

Fully-automatic portioning and bag-packing

Fully-automatic cleaning system

Touchscreen

Temperature alarm with data logging; built-in USB data logging for logging time and temperature

1-4 kg HOT-FILL bags

Made from stainless-steel and easy to clean

Fully-automatic CIP -system cleans all the inner parts of the machine, such as pipes, valves and the pump. The cleaning system dispenses the washing detergent and the disinfectant.

Electric grill Metos Diamante D94/10SGEP

The Metos Electric grill D94/10SGEP in stainless steel with open cabinet. Grill is equipped with height adjustment device of the grids on two levels and it has internal drawer for the collection of residues. The device also has overturning resistances to facilitate the cleaning process. The material of the grill plate is stainless steel and it's suitable especially for fish.

The Metos Diamante 90 -restaurant series is designed for demanding use in professional kitchens and, thus, the appliances are extremely efficient, functional and stylish. The sturdy structure, straightforward use and easy cleanability enable more focus on preparing the food itself. The Diamante 90 -series appliances are available in either a table top version or with its own stand, individually or in combination with other appliances. The appliances are laser cut, which guarantees that they can be connected to other appliances to form a clean and stylish look.

- on open stand
- frame and feet in stainless steel
- stainless steel grill plate for fish
- working-height adjustable from 850 ... 920 mm
- grid height adjustment for managing different types of cooking
- internal fat collection drawer
- with overturning resistances
- two heating zones

Additional Accessories (order separately)

- doors for cabinet
- grill accessories
- humidifier for the optimal management of several types of cooking

Griddle chromium/grooved Metos Diamante D93/10SFTECR with open cupboard

Electric griddle Metos D93/10SFTECR with chromium plate - grooved, is equipped with all the power, robustness and functionality you need to work efficiently.

- Open cupboard version, grooved chromium plate
- Stainless steel coating with Scotch Brite finish
- 15 mm thick cooking plate totally independent of the top
- Large canal canopy along the entire perimeter of the plate for the collection of cooking residues, inclined towards the front for the decelusion of the liquids in the large drawer
- Large fat collection drawer
- Uniform cooking temperature on the whole plate. Optimizing the heat in the coach area and increasing the comfort of operators in the kitchen.
- Plate not welded to the machine with optimization of the structural points subjected to thermal stress
- Too full cap in stainlessness, equipped as standard for the management of the flooding of the canaline
- Plate not welded to speed up maintenance interventions and any replacements in users
- reduced energy power, an increase in yield per cm² which allows a reduction in consumption up to 15% compared to traditional versions
- Heating by means of armored resistances in incoloy
- Thermostatically controlled cooking temperature and adjustable from 110 to 280 ° C
- Safety thermostat

Electric grill Metos Diamante D94/10TSGEP table top

The Metos Electric grill D94/10TSGEP table top model is equipped with height adjustment device of the grids on two levels and it has internal drawer for the collection of residues. The device also has overturning resistances to facilitate the cleaning process. The material of the grill plate is stainless steel and it's suitable especially for fish.

The Metos Diamante 90 -restaurant series is designed for demanding use in professional kitchens and, thus, the appliances are extremely efficient, functional and stylish. The sturdy structure, straightforward use and easy cleanability enable more focus on preparing the food itself. The Diamante 90 -series appliances are available in either a table top version or with its own stand, individually or in combination with other appliances. The appliances are laser cut, which guarantees that they can be connected to other appliances to form a clean and stylish look.

- table top model
- frame in stainless steel
- stainless steel grill plate for fish
- grid height adjustment for managing different types of cooking
- internal fat collection drawer
- with overturning resistances
- two heating zones

Griddle smooth Metos Diamante D94/10TSFTEA table top model

Electric griddle Metos D94/10TSFTEA with steel plate AISI430 - smooth, is equipped with all the power, robustness and functionality you need to work efficiently.

- Tabletop version, smooth steel plate AISI430
- External coating in stainless steel with Scotch Brite finish
- 15 mm thick cooking plate totally independent of the top
- Large canal canopy along the entire perimeter of the plate for the collection of cooking residues, inclined towards the front for the decelusion of the liquids in the large drawer
- Large fat collection drawer
- Uniform cooking temperature on the whole plate. Optimizing the heat in the coach area and increasing the comfort of operators in the kitchen.
- Plate not welded to the machine with optimization of the structural points subjected to thermal stress
- Too full cap in stainlessness, equipped as standard for the management of the flooding of the canaline
- Plate not welded to speed up maintenance interventions and any replacements in users
- reduced energy power, an increase in yield per cm2 which allows a reduction in consumption up to 15% compared to traditional versions
- Heating by means of armored resistances in incoloy
- Thermostatically controlled cooking temperature and adjustable from 110 to 280 ° C
- Safety thermostat

Induction range Metos Diamante D94/10TCII table top model

The Metos Diamante D94/10TCII table model induction stove has four 5kW cooking plates. The cooking plates, which temperature can be adjusted from the adjustor knobs that have twelve level settings.

When operating the induction stove, the ceramic table top frame does not heat up and the only heat exerted comes from the cooking dish used. Moreover, heat does not collect into or around the stove, only the bottom of the pan and the food inside the pan or dish heat up. Therefore, using an induction stove is quick and safe. In addition, the cleaning of the stove is also easy, as food will not burn onto the cool surface.

The Metos Diamante 90 -restaurant series is designed for demanding use in professional kitchens and, thus, the appliances are extremely efficient, functional and stylish. The sturdy structure, straightforward use and easy cleanability enable more focus on preparing the food itself. The Diamante 90 -series appliances are available in either a table top version or with its own stand, individually or in combination with other appliances. The appliances are laser cut, which guarantees that they can be connected to other appliances to form a clean and stylish look.

- table top model
- four cooking plates (5 kW / cooking plate)
- circular display identifies each cooking area
- large adjustors protected from splashes, 12 levels
- frame made of stainless steel
- with sensor to detect pot or pan on surface top
- overheating protection

Ceramic range Metos Diamante D92/10VTC with open cupboard

The Metos Diamante D92/10VTC ceramic stove with an open stand has two 2,6 kW cooking plates. The cooking plates on the unbreakable stove are 220x220 mm, and their temperature can be adjusted from the adjustor knobs that have seven settings. It is possible to simultaneously operate two separate cooking plates, depending on the size of the cooking dish. The temperature in the cooking plates can be adjusted between 50°C and 400°C. The signal light on the control panel lights up when the temperature reaches 50°C. Furthermore, the back edge of the stove is slightly tilted, which prevents splashes from dripping behind it. The Metos Diamante 90 -restaurant series is designed for demanding use in professional kitchens and, thus, the appliances are extremely efficient, functional and stylish. The sturdy structure, straightforward use and easy cleanability enable more focus on preparing the food itself. The Diamante 90 -series appliances are available in either a table top version or with its own stand, individually or in combination with other appliances. The appliances are laser cut, which guarantees that they can be connected to other appliances to form a clean and stylish look.

- with an open stand
- two cooking plates (2,6 kW / cooking plate)
- temperature adjustable between 50-400°C
- large adjustors protected from splashes
- frame from stainless steel
- overheating protection

Induction range Metos Diamante D94/10GCII with open cupboard

The Metos Diamante D94/10GCI induction stove with a stand has four 5kW cooking plates. The cooking plates, which temperature can be adjusted from the adjustor knobs that have six settings, are marked on the unbreakable 6 mm thick ceramic table top.

When operating the induction stove, the ceramic table top frame does not heat up and the only heat exerted comes from the cooking dish used. Moreover, heat does not collect into or around the stove, only the bottom of the pan and the food inside the pan or dish heat up. Therefore, using an induction stove is quick and safe. In addition, the cleaning of the stove is also easy, as food will not burn onto the cool surface. Furthermore, the back edge is slightly tilted, which prevents splashes from dripping behind the stove.

The Metos Diamante 90 -restaurant series is designed for demanding use in professional kitchens and, thus, the appliances are extremely efficient, functional and stylish. The sturdy structure, straightforward use and easy cleanability enable more focus on preparing the food itself. The Diamante 90 -series appliances are available in either a table top version or with its own stand, individually or in combination with other appliances. The appliances are laser cut, which guarantees that they can be connected to other appliances to form a clean and stylish look.

- open stand
- four cooking plates (5 kW / cooking plate)
- for Ø120-280 mm dishes
- large adjustors protected from splashes
- frame from stainless steel
- overheating protection

Ceramic range Metos Diamante D94/10TVTC table top model

The table top model of the Metos Diamante 90 D94/10TVTC ceramic range has four 2.6 kW cooking zones. The unbreakable ceramic hob has 2 x Ø220 mm and 2 x 220x220 mm sized cooking zones, the temperatures of which can be regulated by the 10 position control knobs. The control panel has an indicator light, which illuminates when the hob has been switched on. Two different heating areas can be regulated within the cooking zone, independent of pot size. In addition, the rear of the range is at an incline, which prevents splashes from flowing behind the range.

Every detail of the strong, stylish and hygienic restaurant range series Metos Diamante 90 has been planned as an efficient and functioning solution, from pre-treatment to the preparation of the food itself, without forgetting the need to easily clean the range. Diamante 90 series ranges are available as a table top model as well as with its own cupboard, as single or multiple combined units, and are suitable for use in small to mid-sized to large kitchens. Laser cut range working surfaces allow for the seamless joining together of units into cleanly connected islands or lines in places of heavy use, such as large kitchens.

- two round cooking zones (2.6 kW / cooking zone) á Ø220 mm
- two square cooking zones (2.6 kW / cooking zone) á 220x220 mm
- table top model
- large splash proof control knobs
- exterior and feet are made from stainless steel.
- overheating protection

EXTRA ACCESSORIES (can be ordered separately):

- open stand
- stand with guide rails

- cupboard doors;
 - cupboard doors for utensil frames;
 - utensil frames; knife rack, utensil rack, spice rack frame, spice jar rack;
 - drawer for the cupboard;
 - with a heated bottom;
 - socket;

Ceramic range with oven

Metos Diamante

D94/10VTCE

The Metos Diamante D94/10VTCE ceramic stove with an open stand has four 2,6 kW cooking plates. The cooking plates on the unbreakable stove are 220x220 mm, and their temperature can be adjusted from the adjustor knobs that have seven settings. It is possible to simultaneously operate two separate cooking plates, depending on the size of the cooking dish. The temperature in the cooking plates can be adjusted between 50°C and 400°C. The signal light on the control panel lights up when the temperature reaches 50°C. Furthermore, the back edge of the stove is slightly tilted, which prevents splashes from dripping behind it. A 6 kW electric oven sits under the stove and fits GN2/1 dishes. The oven's temperature can be adjusted between 50°C and 300°C. The Metos Diamante 90 -restaurant series is designed for demanding use in professional kitchens and, thus, the appliances are extremely efficient, functional and stylish. The sturdy structure, straightforward use and easy cleanability enable more focus on preparing the food itself. The Diamante 90 -series appliances are available in either a table top version or with its own stand, individually or in combination with other appliances. The appliances are laser cut, which guarantees that they can be connected to other appliances to form a clean and stylish look.

- four cooking plates (2,6 kW / cooking plate)
- stand with an electrical oven that fits GN2/1 dishes (6 kW)
- oven's temperature adjustable between 50-300°C
- large adjustors protected from splashes
- frame and legs from stainless steel
-

adjustable height between 850-920 mm

- overheating protection

DELIVERY INCLUDES:

- one GN2/1 chrome grate

ADDITIONAL ACCESSORIES (order separately):

- GN2/1 grates and plates
- wheels
- footing
- side panels adjustable height between 850-920 mm
- overheating protection

DELIVERY INCLUDES:

- one GN2/1 chrome grate

ADDITIONAL ACCESSORIES (order separately):

- GN2/1 grates and plates
- wheels
- footing
- side panels

Griddle chromium Metos Diamante D92/10FTEC with open cupboard

Electric griddle Metos D92/10SFTEC with chromium plate - smooth, is equipped with all the power, robustness and functionality you need to work efficiently.

- Open cupboard version, smooth chromium plate
- Stainless steel coating with Scotch Brite finish
- 15 mm thick cooking plate totally independent of the top
- Large canal canopy along the entire perimeter of the plate for the collection of cooking residues, inclined towards the front for the decolouration of the liquids in the large drawer
- Large fat collection drawer
- Uniform cooking temperature on the whole plate. Optimizing the heat in the cooking area and increasing the comfort of operators in the kitchen.
- Plate not welded to the machine with optimization of the structural points subjected to thermal stress
- Too full cap in stainlessness, equipped as standard for the management of the flooding of the canals
- Plate not welded to speed up maintenance interventions and any replacements in users
- reduced energy power, an increase in yield per cm² which allows a reduction in consumption up to 15% compared to traditional versions
- Heating by means of armored resistances in incoloy
- Thermostatically controlled cooking temperature and adjustable from 110 to 280 ° C
- Safety thermostat
